Green Transportation Challenge!

Take the challenge and travel green this April!

Use a green transportation option six times in April and win a prize! When traveling to school, child care, to the park or to other locations, use a green transportation option instead of driving in a car. Green transportation includes walking, rolling (biking, wheelchair, skateboard, scooter, etc.), riding transit, or carpooling. If you have to drive in a car, try parking at least a half mile away and walking to your destination. By using green transportation you reduce air

pollution, get exercise and avoid traffic congestion. Put a check mark next to the green transportation you use each day. Then

email your completed challenge to walknroll@completing the challenge for a bonus prize! By promotion. All Thurston County youth can par	sending a photo you give Intercity Tr
